INTRODUCTION

1.1 What is Unanswered?

Unanswered is a public awareness campaign focused on the gender gap in medical research. The campaign highlights how women are underrepresented in clinical trials, how symptoms are often dismissed or misdiagnosed, and how these systemic gaps affect women's everyday health experiences. Unanswered aims to make this invisible issue visible through clear, bold communication.

1.2 Core Concept

The campaign is built around the idea of missing knowledge. Women's health data is incomplete – and that absence has real consequences. The visual identity reflects this through minimalism, stark contrast, and intentional negative space. Every element communicates the core message: women deserve answers.

2
LOGO

2.1 Primary Logo

The primary Unanswered logo combines a stylized female symbol with a question mark, with the dot highlighted in *Unanswered Red*. This version is the default logo for most applications and represents the campaign's identity clearly and boldly. It should be used wherever the full logo is appropriate, including posters, digital media, and print materials. Black and white versions of the primary logo are available for high-contrast situations on light or dark backgrounds.

Women deserve answers.

2.2 Secondary Logo

The secondary logo includes the full primary logo along with the campaign slogan, "Women deserve answers." This version emphasizes the message and works well in applications where you want both the visual identity and the campaign statement to be immediately visible. It follows the same principles of clarity and proportion as the primary logo.

2.3 Icon Logo

The icon logo consists of the simplified symbol, the female symbol with the question mark, and is designed for small-scale applications such as website icons, social media avatars, or interactive touchpoints. The icon should always remain legible, and its size should not be reduced beyond the minimum readable size.

2.4 Correct Use

The logo should always be used in a way that preserves its clarity and recognizability. The main version is preferred whenever possible, while the secondary and icon logos are used for specific applications where their features are required. Always maintain sufficient clear space around the logo, equal to the height of the U in “Unanswered”.

Use the appropriate version for the background contrast, and ensure the logo remains legible at all sizes.

These principles apply across all applications, from posters and digital media to printed materials and interactive touchpoints.

2.5 Incorrect Use

The logo should never be altered in ways that compromise its integrity. Do not stretch, distort, rotate, or skew the logo. The typeface should remain unchanged, and no shadows, outlines, gradients, or effects should be added.

The logo should never be recolored outside of the approved palette. Avoid placing the logo too close to other visual elements or text, and do not use versions of the logo that reduce legibility or disrupt the visual hierarchy. Following these rules ensures the brand identity remains strong and consistent.

TYPOGRAPHY

The Unanswered campaign uses two typefaces: *Avenir Next Condensed* for strong, impactful titles, and *Avenir Next* for body text and longer information. This combination creates a clean, modern voice that supports the campaign's minimal and factual tone.

Headlines are set in *Avenir Next Condensed Bold*, while body text uses *Avenir Next Regular*. Bold text is only used to highlight key data or important phrases.

Most text is left-aligned to maintain clarity and structure, while center alignment is reserved for titles, slogans, or layouts where a simple, minimal presentation is needed. Right alignment is avoided.

Overall, the typography is designed to be precise, unobtrusive, and honest, supporting a campaign that focuses on clarity and the urgency of missing information.

Avenir Next Condensed - Bold

4

COLOR PALETTE

The Unanswered palette is purposefully minimal. It consists of black, white, and one accent color: Unanswered Red. This restricted palette keeps the visual identity clear, direct, and consistent across all applications.

Black

Used for typography, logo variations, and strong contrasts. Black provides structure and ensures clarity in all layouts.

White

Serves as the primary background color for most layouts, especially data-driven graphics. White supports a clean, minimal aesthetic and keeps information easy to read.

Unanswered Red

A bold highlight color used selectively. It draws attention to key elements such as statistics, icons, highlighted words, data points, and interactive elements. Because the rest of the palette is neutral, Unanswered Red becomes a clear visual anchor.

Use *Unanswered Red* sparingly to maintain its impact. Avoid adding additional colors to preserve brand cohesion. Rely on the contrast between black and white for clarity and simplicity.

Black

C = 0
M = 0
Y = 0
K = 100

R = 0
G = 0
B = 0

HEX: #000000

White

5

GRAPHIC ELEMENTS

5.1 Infographic Style

Infographics in this campaign are built from simple geometric forms that communicate statistics in a clear, immediate way. The visuals rely primarily on pie charts and grid-based arrangements of circles, allowing the viewer to grasp proportions instantly without unnecessary detail.

Color is used carefully and with purpose.

Unanswered Red highlights the portion of each graphic representing women, while the remaining areas stay in black or grayscale. This restrained contrast creates a stark visual imbalance that reflects the research gap at the heart of the campaign.

The overall presentation is clean and minimal, with generous white space and calm, balanced compositions. There are no icons or decorative symbols used in the infographics. Every element exists to clarify the data and reinforce the campaign's direct, honest tone.

5.2 Photography Style

Photography in the Unanswered campaign highlights the personal, human side of the issue. All images are presented in black and white to maintain a clean, minimal aesthetic and to ensure focus remains on the subject and their story.

Images should depict women in everyday situations, such as studying, working, exercising, or simply going about daily life. The tone is natural, unposed, and relatable, emphasizing authenticity over dramatization.

Each photograph is paired with a brief personal statement or lived experience, reflecting how the research gap has affected the individual. The text should be concise and impactful, letting the woman's story speak directly to the audience.

The overall style is quiet, honest, and understated. Composition, lighting, and contrast should be simple and consistent, ensuring that photography blends seamlessly with the campaign's minimal visual language.

6

LAYOUT

The campaign uses a consistent, minimal layout across all materials. On posters, the logo appears in the bottom right corner, and the QR code linking to the campaign website is placed in the bottom left. Titles, statistics, and graphics are positioned to maximize clarity and impact, with ample white space around all elements. The billboard follows the same principle, keeping the logo in the bottom right corner for recognition while ensuring the message remains legible at a distance. This simple, repeated structure creates a unified and recognizable visual identity across all applications.

7

APPLICATIONS

7.1 Posters – Statistics-Based

Statistics-based posters visualize data about the research gap in women's health using simple pie charts or grid-based graphics. The layout emphasizes clarity, with headlines or statistics prominently placed and ample white space around all elements. The logo is placed in the bottom right corner, and the QR code linking to the campaign website sits in the bottom left, ensuring the viewer can easily access more information.

Unanswered Red is used sparingly to highlight the portion of the data representing women, creating a stark visual contrast.

7.2 Posters – Photo/Story-Based

Photo-based posters present real stories from women affected by the research gap. Black-and-white photography is paired with a short personal statement or lived experience, allowing the story to be the focus. The layout is clean and minimal, with the logo in the bottom right corner for recognition, maintaining visual consistency with the statistics-based posters. Typography and spacing are designed to keep the story readable and impactful.

7.3 Business Cards / Unique Touchpoint

The campaign uses card-sized materials to engage the target audience directly and spark curiosity about the issue. The cards are small and portable, making them easy to carry, share, and give to others. They can also be strategically left in public or semi-public spaces such as café tables, women's bathrooms, on campus, or in more unexpected locations. This approach allows the cards to function as a broader marketing campaign that encourages discovery and engagement.

The front of the card is entirely Unanswered Red, featuring a bold white question at the center. The back provides the answer, followed by the slogan "Women deserve answers." The campaign logo sits below the text, and a QR code linking to the website is placed on the right. This minimal, bold, and interactive design reinforces the campaign's visual identity while creating a tangible, memorable touchpoint that invites interaction and spreads awareness.

7.4 Billboards – Statistics-Based

The statistics-based billboard presents a single key data point in a minimal format to ensure immediate legibility for viewers from a distance. The logo is consistently positioned in the bottom right corner, and the layout emphasizes clarity and bold contrast. The design mirrors the style of the statistics-based posters, reinforcing a unified visual identity across campaign materials.

7.5 Billboards – Photo/Story-Based

The story-based billboard showcases a real story from a woman affected by the research gap. Black-and-white photography is paired with a short statement or lived experience, creating an emotional connection while remaining minimal in design. The logo is positioned in the bottom right corner, consistent with all other materials. The layout is simple and uncluttered, ensuring the message is immediately understandable even at a glance.

TONE OF VOICE

The Unanswered campaign communicates with clarity, authority, and empathy. All messaging should be direct and easy to understand while remaining professional and evidence-based. The tone is precise, minimal, and focused on the facts, reflecting the urgency of addressing gaps in women's health research.

While the campaign is factual, it also connects with people on a human level. Messages should respect the audience, engage curiosity, and encourage reflection without using fear or sensationalism. Short, clear statements, bold statistics, and thought-provoking questions are key tools in expressing the campaign's voice.

9

SLOGAN

The campaign slogan, “Women deserve answers,” is a core element of the Unanswered brand identity. It communicates the central message of the campaign in a concise and impactful way. The slogan should always be presented in the approved typeface and never altered, abbreviated, or translated.

The slogan can appear alongside the logo, especially in graphics and materials that explain or promote the campaign, or it can stand alone in layouts where the message needs to be emphasized. It should always be easy to read at a glance, with sufficient contrast against the background. All typography rules from this manual, including size, weight, and alignment, should be applied. The text should not be distorted, rotated, or decorated with effects.
